Thank you for meeting with me yesterday. As per our discussion, below is a list of the changes we would like to implement:

* Interior service: *EVERY OTHER MONTH*

The service technician will treat all point of entries, door entrances, windows etc.

He will treat the accessible baseboards & all pipes that are not obstructed by towels, medications etc.

He will treat all patios.

The technician will dust with boric acid between all appliances and any other areas that may be beneficial, providing the area is not accessible to residents.

He will treat all closets, providing they are left open or permission is given to the technician .

The wall plates will be removed & dusted when necessary.

He will keep a not serviced unit list that will be provided to Iris in the Lime Bay office.

* Exterior service: WILL BE DONE MONTHLY WITH BAIT STATIONS

The service technician will treat the common areas.

He will treat the entire perimeter within 15 feet of the building if ants are found at the base of the building, window or door frames.

He will treat the meter rooms, dumpsters, storage rooms, elevator shaft and any other areas that are accessible.

All bait stations will be re-baited.

In the event that bad weather prevents the exterior service from being completed, the technician will notify Iris and Renee in our office will reschedule that service day.

* Schedule:

Bug Off Exterminators will treat the interior of buildings 15, 16 & 17 on the even months and buildings 18 & 19 on the odd months. The service technician will be onsite the 4th Wednesday of each month; he will begin at 8:30 am and go from top to bottom. The common areas & rodent bait stations will be monitored and re-baited monthly.

* Monthly payment:

If approved, we would like to bill \$383.50 each month which will include the every other month interior service, monthly exterior service and the monthly monitoring of the rodent bait stations.
